The Departments Pistol and Rifle classifications have been established in order to provide shooters an opportunity to shoot different weapons in different classifications.												
Each competitor is eligible to receive one department award for rifle and one for pistol each match season.												
All scores of all weapons classes will be submitted to the Department for awards consideration. However, only the shooters highest score for any one class shall receive an award.												
Example: If a shooter shot a score of 460 in the Optic Class and a score of 430 in the Service Class the score of 460 Optics Class will be submitted for award in that class.												
There must be at least two competitors in a classification to be considered for awards.
